Windows 7

First, make sure Internet Explorer 7.0 (32-bit version only) or higher is installed on your pc. Here is how you can check:

1. Open **I**nternet Explorer by clicking the **Start** button .

2. Click **All Programs,** then click **Internet Explorer.**

3. Click the **Tools** button , and then click **About Internet Explorer**. If you are running the 64-bit version of Internet Explorer, this will be indicated at the end of the **version** line. Instructions for opening the 32-bit version of IE can be found in the next step. See below:

To **Upgrade Internet Explorer**, enter the following link into the address bar of your browser: http://windows.microsoft.com/en-US/internet-explorer/products/ie/home

➢ Select the operating system that is currently installed. Not sure whether you have a 32-bit or 64-bit Vista? See below:

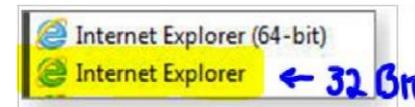

➢ Click the **Download** button, then follow the on screen instructions. Click **Run,** and the installation should begin automatically. When the installation is complete, **Restart** your computer.

FloorWizard only runs in the 32-bit version of Internet Explorer. To keep from accidentally running **FloorWizard** in the 64-bit version, you should create a 32-bit IE shortcut on the desktop by following these instructions:

1. Click **Start** > **All Programs**, and you will see both the 32-bit version and the 64-bit version of Internet Explorer

2. **Right click** on the **32-bit version**, then click **Copy.**

3. On the desktop, **Right Click** the background, then click **Paste.**

4. If there is already an IE shortcut on the desktop, **Replace** it with the 32-bit IE Icon.

5. **Rename** the new shortcut by **Right Clicking** on it, then click **Rename**

6. Type **FloorWizard** **Logon** and press **Enter**

Configure Internet Explorer settings for FloorWizard

Open IE browser, click **Tools** button, then click **Internet Options**

1. In the middle right of the **General** tab, under **Browsing History** click **Settings.**

2. Make sure that the radio button **Every visit to the page** is **enabled** then select **OK.**

3. You are now back at the **General** tab. Under **Appearance** (bottom section) select **Accessibility** and make sure all checkboxes are unchecked, and then select **OK**.

4. On the **Security** tab, click the **Internet** icon. *Uncheck* **Enable Protected Mode**

5. Go to the **Connections** tab. At the right-bottom, select **LAN Settings**. Make sure the checkbox for **Automatically detect settings** is checked and then select **OK**.

6. Now, go to the **Advanced** tab and scroll down to the **Security** section. The second checkbox should read **Allow active content to run in files on My Computer.** Make sure this box is checked.

7. Type the following URL into the address bar of your browser: http://www.floorsoft.com/FloorWizard/web/Logon.jsp and depress the **Go** button or the **forward arrow** to navigate to that address.

8. *Internet Explorer 7*, click the **Add to Favorites** button , Give the new favorite a name of **FloorWizard logon** and click **OK**.

    Internet Explorer 8 & 9, click the **Favorites** button, then click the **Add to Favorites** button, name the new link **FloorWizard Logon,** then click **Add** button.

9. click **Tools** ⚙ button, then click **Internet Options.** On the **General** tab, click the **Use Current** [Use current] button located in the **Home Screen** section. Click **Apply.**

10. Close all browsers and your settings should be in place upon re-open

Install Java 1.6.0_26

First, you should uninstall all older versions of Java. See below:

1. Click the **Start** 🔵 button > **Control Panel** > **Programs** > **Programs and Features.**
2. Click on each instance of Java**,** then click **Uninstall** button. Older versions of Java may appear in the program list as **J2SE Runtime Environment** or **Java 2 Runtime Environment**. All versions should be uninstalled before continuing.

Now, install **Java 1.6.0_26** from the FloorSoft website. **Ctrl + Click** this link: http://www.floorsoft.com/dl/jre-6u26-windows-i586-s.exe or See below:

1. Type www.floorsoft.com into the address bar of your IE browser, the click **Go** 🔄 button or the **forward arrow**.
2. Click **Support** button, then click **Install Java** button.
3. Click **Run** button, then follow instructions on screen.

OR

Next, disable Java's automatic update feature. See below:

1. Click the **Start** 🔵 button > **Control Panel** > **Programs.**
2. **Right Click** the **Java** icon, then click **Open.**
3. Click the **Update** tab, then uncheck the box next to **Check for Updates Automatically.**
4. Click **OK.**

Complete the Setup by Installing FloorWizard

1. Internet Explorer should still be opened to the FloorSoft website. From there, click the **Support** tab and click the **FloorWizard Logon** button.

2. You wiill need your FloorWizard logon and password to continue. If you never received this information, please call our main office at (706) 226-0960, and one of our reps will assist you.

3. Enter your Logon and Password then click the **Logon** button. You will navigate to the FloorWizard Home Page

4. Click the **Project Center** button.

5. The system will begin to Install the necessary FloorWizard files automatically. When the following dialog box appears, Check the box next to "Do not ask again...." and then click Later to continue. See below:

6. When the Java digital signature verification box appears, check Always trust content from this publisher" and then click the Run button as shwn below:

7. The file download may take up to 15 minutes depending on speed of your connection. You should automatically navigate to Project Center. The FloorWizard setup procedure is complete!!
